THIS IS UNEVALUATED INFORMATION

Routes 111 and 112 have been rebuilt and widened. They have been surfaced with macadam. Connecting with this route(sic), the road which connects the triangle of Pilisvörösvár, Pomáz, and Pilisszentkereszt has been rebuilt and widened. It is now six meters wide. It is surfaced with the best quality macadam.

Concerning routes 361 (Nyíregyháza, Baktalorantháza, Nyírmada, and Vasárosnamény) and 47 (Vasárosnamény, Gergelyugorinya, and Csaroda):

- The bridge over the Tisza has been reinforced by columns of reinforced concrete.
- A dangerous corner near Gergelyugorinya has been eliminated by a new road four km. long.
- Recent Russian orders state that these routes must be considered of the first importance and kept in the best repair.
- As a result of this order, a technical center for supervising and maintaining these routes has been set up at Vasárosnamény. This center is directed by Russian engineers, who have the right to requisition labor when the maintenance of the road requires it.
